EDUCATION

Boston University, College of Arts and Sciences

BA Computer Science, BA Economics; GPA 3.93; Dean's List (All Semesters)

Boston, MA

May 2027

PROFESSIONAL EXPERIENCE

MirrorTab (Haven) (starthaven.com)

San Francisco, CA

Software Engineer (Contract; summer intern, now part-time)

Jun 2026 – Present

- Own end-to-end projects for Haven, a browser-security product, across Kotlin/Ktor, React/TypeScript, a Chrome extension, Google Cloud, and internal MCP tooling.
- Moved CRM synchronization to Cloud Tasks with an OIDC-authenticated, idempotent handler and retries, removing a blocking third-party API call from a user-facing write path.
- Built a production lifecycle email platform with a consent schema, self-scheduling sequence engine, Cloud Scheduler dispatch, and RFC 8058 unsubscribe/suppression handling.
- Audited B2B console scalability, identifying an unbounded endpoint returning all members' extension inventories; built a shared pagination component for console tables.

The Nudge (www.nudgetext.com)

San Francisco, CA

Software Engineer (Contractor)

Aug 2025 – Jun 2026

- Built backend services in Scala with Akka HTTP and mobile features in React Native and TypeScript for a 2.5M+ user production app.
- Led the Expo SDK 53 to 54 upgrade end to end: New Architecture compatibility, an OAuth flow rewrite, a StoreKit 2 payments migration, and full QA.

Software Engineering Intern

Jun – Aug 2025

- Shipped a mobile ticketing feature that processed \$15K in gross transaction volume.

Boston University

Boston, MA

Teaching Assistant, CS351 Distributed Systems (Go)

Aug 2026 – Present

- Lead a weekly discussion section for 20 students; hold office hours and answer Piazza questions for a course enrolling approximately 90 students.

Course Assistant, Computer Science Department

Aug 2024 – Dec 2025

- CS501 Server Application Development (graduate): Mentored students and created grading rubrics.
- CS132 Geometric Algorithms: Held weekly office hours; streamlined grading of 150+ assignments per week.

SELECTED PROJECTS

Lumina (Next.js + TypeScript + Stripe)

lumina-reno.com

- Built and launched a Reno wellness center's website with signup, session booking, and Stripe package and subscription billing for paying clients.

DormDash (React Native + ASP.NET + Supabase)

GitHub

- Built a cross-platform delivery app with React Native, a C# ASP.NET backend, and Supabase; integrated Stripe payments and payouts.

SKILLS

Programming Languages: Kotlin, Scala, Go, TypeScript/JavaScript, Python, C#, Java, SQL

Frameworks & Tools: Ktor, Akka HTTP, React/React Native, Next.js, PostgreSQL, Google Cloud, Docker

LEADERSHIP & ACTIVITIES

Kappa Theta Pi (Professional Technology Fraternity) | Web Admin & VP Finance

- Rebuilt KTP-Bostonu.com with a four-person committee; maintained the MERN-stack site on Vercel.
